West Michigan Rivers-Fishing Report

March 16th, 2010

Warm weather and hot fishing

Pere Marquette Temps - mid 40's Water Conditions - up & dirty/perfect
>>>The upper half of the Pere Marquette River is perfect after the recent rain and snow melt. The steelhead are spawning with hopefully new fish on the way from Lake Michigan. Big stone-fly hatch today. *Kevin Morlock*

Big Manistee Temps - 40 Water Conditions - high & muddy
>>>Warmer temps and rain have brought mud and high water to the Manistee River. The fly bite is tough with the dirty water conditions, go big and bright to get noticed.

Muskegon Temps - 36 Water Conditions - above average & stained
>>>Water levels have risen dramatically due to snow melt and rain. Consequently, steelhead have begun to enter the Muskegon River in large numbers. Bottom bounce with stones, wiggle hex's and black leaches for the best results. The afternoon bite has been best. *Phil Cusey*

Morlock's Steelhead Ammo

Hook... TMC 105, size 4-6
Eyes... medium bead chain
Tail... marabou
Body... sparkle yarn
Hackle... pheasant (or other hackle of choice)

Two of several fish that were caught and released on the Pere Marquette today!
