West Michigan Rivers-Fishing Report

November 10th, 2009

Good steelhead fishing with perfect conditions

Pere Marquette Temps - 40's

Water Conditions - perfect

>>>Good numbers of steelhead in the PM River with perfect water conditions. The lower water is high with a dark color, go big and bright. Salmon are about gone so the steelhead focus around spawning gravels is slowing down. *Kevin Morlock*

Big Manistee Temps - 43

Water Conditions - good

>>>Reports are that the steelhead bite has slowed on the Manistee River. Steelhead are moving into slower holding and feeding waters, large streamers are still producing.

Muskegon Temps - 49 degrees

Water Conditions - slightly stained

>>>Water levels have slowly fell, current cfs is 2480. Recent high water has brought decent numbers of steelhead in the Muskegon River. Additionally, once the flows stabilize, trout should find their way back to traditional holding areas. *Phil Cusey*

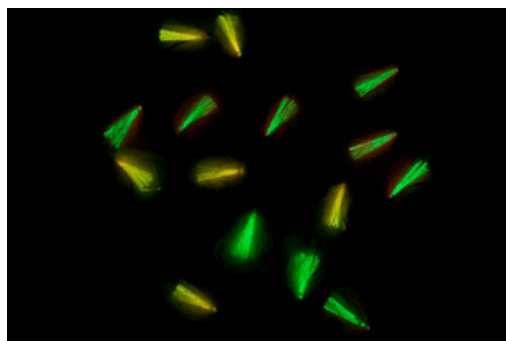

Perfect Michigan Steelhead!

A couple of the perfect steelhead that have been caught and released in our west Michigan streams in the past few days.

Glow Nite Eggs

A good choice when you need an attention getter in high dark or dirty water.
