West Michigan Rivers-Fishing Report

November 30th, 2009

Fresh Michigan steelhead with the Thanksgiving rain!

Pere Marquette Temps - low 40's Water Conditions - perfect

>>>The steelhead fishing was on a steady downslide until the nice rain around Thanksgiving. The river got pretty dirty for a day or so but is now perfect. A scouting trip to the lower river proved that a fresh batch of fish are on the way up. *Kevin Morlock*

Big Manistee Temps - 43 Water Conditions - a bit high with color

>>>Consistent numbers of steelhead and lake run browns are being caught. It looks like the rain has supplied the Manistee River with some fresh steelhead.

Muskegon Temps - 44 Water Conditions - slight stain, average level

>>>Recent high water has brought decent numbers of steelhead in the river. Trout are beginning to put the fall feedbag on! Try nymphing in and down from riffles as well as streamer fishing. *Phil Cusey*

Right -- A couple of the fresh Pere Marquette steelhead from this morning. Both of these took a Grau's Tracer Bullet... a giant nuke egg (1 1/2 -2 inches) tied on a tube.
Bottom -- Mystery fish. This fish took a 4 inch streamer and weighted about 5 pounds, caught in the PM River this morning. The first person to email me the correct species wins a free guided trip! <<< **FREE GUIDED TRIP** >>>
